These are the thoughts of all men in all ages
and lands, they are not original with me.
If they are not yours as much as mine, they are
nothing or next to nothing.
If they do not enclose everything, they are
next to nothing.
If they are not the riddle and the untying of
the riddle, they are nothing.
If they are not just as close as they are distant,
they are nothing.

— Walt Whitman
From *Leaves of Grass*

Table of Contents

Foreword:
Education for the 21st Century –
A Crisis in Learning

Introduction
Freedom from Psychological Conditioning

Author's Note

- Can Thinking Solve the Problems Thinking Has Created?
- The Myth of Many Paths
- Politics – The Art of Conflict
- The Ending of War – An Holistic Approach
- Creative Discontent

Afterword:

Where Do We Go From Here? –

The Future of Education
and the Need for a Fundamental Change
in Our Approach to Learning

Brave New Child

Can there be a profound learning
that opens a child's mind
to view the fundamental causes of conflict?

“Education is much more than learning how to read and write; it has to do with understanding ourselves in relationship.”

“Perhaps the most important intention in educating young people is to provide an environment that is free from fear. Fear generates hate and violence, and therefore prevents understanding. The nature and structure of fear must be explored within this new school if young people are to be free of conflict.”

“In this new school, children will be encouraged to understand what intelligence is; that is, that capacity that can understand conflict in relationship. Children will need to understand that sentiment and emotionalism can be destructive . . . the playing of national anthems and the political frenzy generated by melodramatic displays of patriotism are forces that destroy intelligence and only contribute to more conflict.”

“Can we help the child understand the whole of thinking: technological knowledge as well as knowledge that has entered the field of relationship . . . knowledge that has created social ills, knowledge that has created conflicting solutions to solve the problems knowledge has created?”

BRAVE NEW CHILD – Education for the 21st Century is concerned with bringing about a psychological transformation in learning, awakening the capacity of intelligence that understands the destructive influences of psychological conditioning.

BRAVE NEW CHILD explores a fundamentally different perspective in education that lays the foundation for a completely original way of learning and living.
